Once again we near the true garden lovers most looked for period of the year. Yes, it's Fall planting time. If you happen to be one of the many thousand deJager customers, you know, when planting your bulbs, that your Spring flower garden will be one of gorgeous beauty and unexcelled loveliness.

Bulb planting, in itself, is not an arduous procedure, however, some of your time must be given to this task. The difficult period is the watching, waiting and wondering until the Springtime brings forth the results of your endeavour.

When you plant deJager bulbs, you can anticipate with certainty the ultimate of garden perfection. This is not an idle statement on our part. The deJager nurseries were established in the year 1870 at Heiloo, Holland. Since that time the nurseries have continued to be operated by the deJager family. Years of personalized experience go into the production of every bulb. None but the finest, largest and healthiest superb quality bulbs are offered to our customers, and, because we grow and market our own stock, our prices are the same or less than what you would pay for ordinary stock.

This year plant the best, deJager superb quality bulbs and eliminate any chance of disappointment. We assure you and guarantee complete and highest satisfaction. Because some varieties of bulbs are difficult to produce in quantity than other types, the price range is a little higher. Regardless of the price, every bulb is of superb quality.

To our regular customers we wish to express our sincere thanks for your valued patronage and to reassure you that our standard of quality remains at the high level established through the years.

If this happens to be your first acquaintance with deJager, may we urge you to complement us with a trial order. We repeat that we guarantee you profound satisfaction.

Let us call your attention to the many varied collections of bulbs listed in this catalog. These are specially selected for their full range of beautiful colours.

Planting schedules for all locations are listed by us and we will send your order, with complete planting instructions, at the proper planting time.

We make a great Speciality of Tulips

Tulips belong to the most beautiful of Spring Flowers. Graceful and of impressive beauty they provide a brilliant colour display in the garden for at least two months in succession. Tulips are of easy culture as

they are quite hardy and free flowering in either a sunny or shady situation.

A careful selection of varieties is advised to ensure a continuous flowering period. **Kaufmanniana** Tulips and other **Rare Tulip Species** bring a gay colour riot in the Rockery or border when **Narcissi** are almost over. Early in April, the **Single Early** Tulips are in bloom, celebrating with fine colours the arrival of a new season. A little later the **Early Double** Tulips attract the attention with their colourful and peony-like flowers, **Mendel** and **Triumph** Tulips with their long stems, vigorous habit and wonderful shades are the finishing touch of April. In a wide range of shades, self-colours and bi-colours they give brilliancy to the Garden when flowers are needed to bridge the interval until May.

All through May, **Darwin, Cottage, Lily-Flowering, Parrot, Breeder** and **Double Late** Tulips are in bloom at almost the same time or in this succession. They give a parade of brilliant colours from pure white to almost black, from softest pink to deepest purple, all on splendid stems and with

great alterations in form.

All Tulips are extremely useful for the garden and bring gaiety, pleasure and satisfaction.

Collections of Tulips: Of all different sections of Tulips, we offer in this catalogue very fine Collections which are carefully chosen and assembled to give entire satisfaction in your garden, border or for plantings anywhere around your home. The easiest to grow, distinct and dependable varieties are selected to produce a harmonious display of balanced beauty in a full range of colours.

Each variety is separately packaged and correctly labelled. All bulbs are choice selected varieties of top

size.

Anyone not familiar with names of Tulips may order de Jager's Collections with every confidence and which are offered at a good saving too.

Outdoor Planting: Plant Tulips in groups of 6 or 12 to make a good display in the border or bed, 6 in. apart and 4 in. deep. They can be planted in Autumn until severe frosts set in. Tulips thrive well in any type of soil but if heavy, add some sand. Well cultivated and well drained soil is important. Dig soil before planting and do not have Tulips in the same location some years in succession, unless the soil has been removed and replaced with fresh at a depth of at least one foot. Inattention to this matter is often the cause of failure with Tulips. It is advised never to allow any part of the dead foliage or flower to drop on the ground. These parts carry diseases and infect the soil. Only use well decayed and old manure.

For Forcing: Early Tulips (single and double) including Mendel Tulips are suitable for earliest forcing, while Darwin and Triumph Tulips are for late forcing. After planting and plunging the Tulips it will take at least 10–12 weeks, before the shoots and sprouts are high enough that they may be brought into a dark room at a temperature of 55–60° F. to allow the stems to lengthen. After 10 days to two weeks the Tulips can be removed into a light warm room. For a few days, the bulbs should be covered with some paper before exposing to the full light. Tulips should never be hurried and bottom heat and draught should be avoided. Generally speaking, Amateurs should never bring in the bulbs, until the shoots are 3 to 4 in. high and after the middle of January.

Origin: The first time Tulips were ever mentioned, was in 1554, when Busbequis found a few specimen near Constantinople. Six years later, Carolus Clusius brought some of these Tulips to Holland and in 1601 he described 19 varieties in full detail and added 5 pictures. Dodonaeus wrote about Tulips in his Kruydtboek in 1618 and made three different sections. Most of the Tulips had broken colours and this was considered very fashionable. In 1634–1637, during the Tulipmania, fantastic prices were paid for bulbs, e.g. 1 Semper Augustus \$ 2200.—, weight 2000 aces. The bulbs were sold per 'ace', one ounce is 5900 aces, and a good tulip bulb weighs now 7000 aces.

Darwin Tulips

(May-flowering)

We confidently recommend this late-flowering section of self coloured Tulips with their stately bearing and rich colours. They deserve universal attention and are most valuable in the garden, borders etc. on account of their brilliant colours and their long upright stems. The Darwins flower after the Triumph Tulips and are excellent for cutting, just at the time when most spring flowers are over and there is scarcity of flowers. As cut-flowers they are decorative in vases and last a long time in water.

Origin: A collection of Tulips imported from the North of France by Messrs. Krelage & Son at Haarlem. The actual origin is not known, but they were offered and brought into circulation in 1889, when they caused a real sensation, because of their long stems and fine colours.

For Forcing: Varieties marked with an asterisk (*) are suitable for late forcing and they should never be forced in too high a temperature and should be watered moderately. Darwin Tulips cannot be had in flower much before February, with the exception of the varieties Wm. Copland and Rose Copland which may be brought into the greenhouse for gentle forcing about the end of December.

COLLECTIONS OF TALL GIANT DARWIN TULIPS

Collections made up to give entire satisfaction. The distinct and reliable varieties produce a harmonious display of gorgeous colours, the envy of all who can appreciate their loveliness.

It sometimes happens that a stem-leaf becomes attached to the flower bud of a Tulip. In order to allow the bud to follow its natural course, it is essential to cut the leaf at the base and let it remain attached to the flower. It will then develop properly and will do no harm to the bloom.

Breeder Tulips

(May-flowering)

These majestic Tulips have now gained important prominence in gardens, as their refined flowers which are held on heavy upright stems produce a most artistic effect. Their fascinating colours of rich shades and tints in glorious autumnal purple and gold and bronze orange, yellow, soft copper and combinations of such colours rival the glorious rich tints of Indian Summer and are not be found in other May-flowering Tulips. On account of their enormous size and vigorous growth, yet perfect in form and proportion, Breeder Tulips are a wonderful addition to the garden.

Cottage Tulips

(May-flowering)

Cottage Tulips are so named because they have mostly been found in old Cottage Gardens of Great Britain and France, where they have been growing for a great number of years. They are distinct in habit, embrace many beautiful colours and are excellent for borders, where they should be freely planted in large clumps or masses. They may also be naturalized in grass, Wild Gardens, etc. and present a gorgeous display during the month of May.

COLLECTIONS OF COTTAGE TULIPS

As in all collections of Bulbs offered in this catalogue, our collections of Cottage Tulips are made up very carefully, comprise a full range of colours and varieties of good merit only. Customers may be assured to receive all Top-Size bulbs.

Lily-Flowering Tulips Gisela

Lily-Flowering Tulips

(May-flowering)

Unsurpassed for elegance and charm, the varieties of this section are most graceful and highly distinct. Beautifully reflexed and pointed petals form flowers of fascinating beauty which are borne on tall wiry stems, rendering them extremely useful for cutting and table decoration. Lily-flowering Tulips are a handsome contribution to the garden and give their refined display in May. Plant in groups of twelve in order to obtain a more beautiful effect.

Origin: this race is a result of crossing the old retroflexa (1830) with Darwin Tulips. The hybrids were first exhibited by Messrs. E. H. Krelage & Son of Haarlem, Holland in 1923. Retroflexa possesses the elegant recurved petals and is still listed in our catalogue under this section.

Triumph Tulips

(Mid-Season)

A race of Tulips with most outstanding characteristics and merits. They are exceedingly valuable for the flower-garden, in borders etc. on account of their strong tall stems and vigorous habit. Most pleasing shades of the self-colours, bi-colours, edges, flushes, stripes and margines, which will not be found in other types of Tulips and this stresses the beauty of this section. Triumph Tulips flower immediately after the Mendel Tulips and are a valuable addition to obtain a continuous display of Tulips. The substance and the size of the flowers are superior and some varieties will force steadily.

Origin: This group is a result of hybridising Single Early Tulips with Darwin, Breeder or Cottage Tulips. The first introductions came from Messrs. Zocher & Co. at Haarlem in 1918. Five years later,

they were officially registered as Triumph Tulips.

COLLECTIONS OF TRIUMPH TULIPS

We offer interesting collections of Triumph Tulips at a much reduced rate to encourage the cultivation of these good Tulips which deserve to be grown more extensively. We can strongly recommend our customers to try our collections which will give entire satisfaction. Mendel Tulips

(Mid-Season)

This type owes its particular value to the fact that it has contracted the glorious colours and the astounding value for the garden of the Darwin Tulips and the earliness of Duc van Tholl. They are of excellent habit and beauty and flower in the garden 10 to 14 days earlier than Darwins, thus bridging the interval between Single Early and Triumph Tulips. Most varieties can be forced early quite easily and in a short time, this adds considerably to their value. In the description of each variety, the approximate forcing date is mentioned.

Origin: The name of this race was given to a group of varieties obtained from cross-pollination between Duc van Tholl and Darwin Tulips by Messrs. E. H. Krelage & Son of Haarlem, Holland. These seedlings flowered for the first time in 1915 and were introduced at Haarlem in 1921. They caused a real sensation and fancy prices were paid for the stocks.

Forcing: After the rooting period they may be exposed at once to the full light, contrary to all other Tulips which should be started in the dark. If for some unforeseen reason the height is not obtained and the bulbs are found to be lazy, they should be left in the dark for a few days and thus encourage the sprouts to lengthen. See information on page 2.

COLLECTIONS OF MENDEL TULIPS

These collections of Mendel Tulips are made up of such varieties that are particularly suitable for pot and bowl culture for flowering in the later part of January. They are, of course, also suitable for planting outdoors.

Parrot Tulips

(May-flowering)

These artistically shaped flowers with their heavily laciniated petals have no rivals for exquisite effect. The gorgeous flowers are large and strikingly beautiful, very effective and picturesque in the garden for their rich brilliancy and fine for table decoration and in vases. A mixed bunch of Parrot Tulips creates a fascinating and artistic effect and lasts well in water.

Origin: All the Parrot Tulips are sports of Tulips from various sections and with the exception of their laciniated segments have more or less the same qualities as their originators. It is known that of the old varieties Lutea major and Markgraaf van Baden were in existence in 1680, with these and some other old varieties, they are still grown. New Parrot Tulips are all strong, tall and dependable in blooming, whereas the old varieties are shy bloomers with weak stems.

COLLECTIONS OF NEW PARROT TULIPS

The varieties of these collections are outstanding in beauty and fascination, in full colour harmony and suitable for garden and cutting purposes.

Late Double Tulips

(May-flowering)

This section are May-flowering and represent almost an entirely new group. Much time has been devoted to the production of new colours and the result has been the creation of very beautiful varieties which are delightful for bedding or planting in groups in the border or among Evergreens etc. They are of sturdy habit with strong stems to hold erect indescribably beautiful flowers. For the most outstanding effects plant several groups in your garden. They do not object to a little shade.

COLLECTIONS OF LATE DOUBLE TULIPS

We give special attention to the selection of beautiful collections of Double Late Tulips of good proven Garden varieties.

Early Single Tulips

Early Single Tulips are very useful for bedding purposes or for garden borders. They do not possess the same size of bloom and length of stem as the May flowering Tulips and may therefore be excellently used in front of late flowering Tulips to extend the flowering season. They are of easy culture and most are fine for forcing.

COLLECTIONS OF EARLY SINGLE TULIPS

When ordering any of the collections offered below will Customers please mention if they are required for forcing or outdoor culture. We are always careful that we include only varieties of good merit and beauty in our selections as well as a full range of colours. Bulbs are of first quality and purchasers may rely upon getting very good value in every respect.

Early Double Tulips

Double flowering Tulips are of fairly robust growth and have massive flowers, in many cases they are as large as small Peonies and last somewhat longer than Single Tulips. The Double Tulips are not so elegantly formed as Single Tulips, nevertheless they are exceedingly useful and effective for bedding purposes. Most of the Double varieties are excellent forcers and make fine displays when grown in pots, pans, boxes, etc., they should however be forced slowly.

COLLECTIONS OF EARLY DOUBLE TULIPS

We include in our collections of Early Double Tulips five beautiful different coloured varieties of the same habit and height, which we can recommend with every confidence.

The exacting Gardener will want his or her bulbs to come direct from the actual grower for more than one reason. The assurance that the bulbs receive expert storing, handling and packing. No hand touches the bulbs between the time they are packed on the bulb farm and the time the package is opened at the moment they are required for planting or potting. Bulbs should be handled very carefully, please observe this and your attention and carefulness will be rewarded tenfold when you come to look for healthy and sturdy plants and blossoms in Winter or Springtime.

Bizarres Mixed

Rembrandt Tulips

(May-flowering)

The Rembrandt Tulips comprise a strain of Darwin Tulips, which have broken into a permanent variegation. The flowers are beautifully striped and blotched and are remarkably attractive in flower-beds and borders. They were named Rembrandt Tulips on account of their resemblance to the Tulips seen in old Dutch Paintings.

Fosteriana Species & Hybrids

Is it not somewhat remarkable to think that after more than three centuries of careful cultivation and hybridising, Western Europe has not been able to produce anything to match in size and brilliancy of colour with these Bokhara Tulips growing wild on the mountain slopes of the Asiatic desert. We may, however, predict that by the influence of Tulipa Fosteriana in course of time an extremely large new strain of Tulips will be produced that will stand out in size and colour such as Tulipa Fosteriana Red Emperor (Mad. Lefeber), Holland's Glory etc. Plant Tulips Fosteriana 9 inches deep.

New Fosteriana Mixed Hybrid Tulips, we offer for the first time a very fine Mixture of colours of these new Masterpiece Tulips, which come from a crossing between Fosteriana and Kaufmanniana Tulips. They produce many different pastel shades and have most wonderful conspicuous coloured hearts and are exceptionally choice, exotic, fascinating and beautiful. Limited stock.

\$ 1.75 per doz.; **\$ 12.00** per 100

Agamemnon (20), large scarlet flowers of huge size opening quite flat, base orange and black, tall. \$ 2.00 per doz.; \$ 14.00 per 100

The Collections offered in this catalogue include only valuable varieties of good merit and beauty as well as a full range of colours. Bulbs are of first quality and purchasers may rely upon getting good value in every respect. All the different varieties are properly and separately labelled.

Kaufmanniana Species & Hybrids

One of the most remarkable groups of Hybrids of recent introduction form the beautiful Tulipa Kaufmanniana. They flower far ahead of other Tulips on short stems and establish themselves easily, coming up freely year after year without any care. Most of them have mottled, striped, or spotted foliage like Greigii, which is a beautiful and interesting characteristic on its own. We very strongly recommend them for the rock-garden, border and other places where they can be left undisturbed.

- Elite Mixture (Peacock Tulips). We offer a very fine Mixture raised from Greigii × Kaufmanniana which will be found far superior to what is usually sold as Kaufmanniana Hybrid Rainbow Mixture. Including many surprise-seedlings of exciting and unusual colour-combinations with lovely and interesting mottled foliage. \$ 2.50 per doz.; \$ 17.50 per 100
- Kaufmanniana (Waterlily Tulip) (Central Asia) (6), charming species producing in March large flowers of elegant form and remarkable beauty, opening out to a great size in the sun; colour soft creamy-white with centre slightly marked with carmine-red, strongly recommended for planting in groups in borders and in rock-gardens may be left undisturbed and will flower for many years.

 \$ 1.40 per doz.; \$ 9.75 per 100
- Alfred Cortot (Hybrid) (8), an outstanding Hybrid on account of its striking colour of glowing bright scarlet with a jet-black base and beautifully mottled leaves. Highly recommended at R.H.S. Wisley trials 1948.

Rare Tulip Species

Some of the Tulip Species are very scarce, therefore please order early to ensure delivery. A large number of the dainty and small species like Linifolia, Batalini, Eichleri, etc., are especially recommended for the rock-gardens, where the little groups of flowers are best seen to advantage. The large and more sturdy growers such as the Fosteriana's, Kaufmanniana's (listed under separate groups), and Acuminata with its wired horned petals are unequalled in a herbaceous border, where they multiply its excitement and glory in springtime.

COLLECTIONS OF RARE TULIP SPECIES

As in all our collections of bulbs offered in this catalogue, the collections of Rare Tulip Species are made up very carefully, containing the best and most interesting for the rock-garden and other choice places.

Daffodils and Narcissi

The beauty of Daffodils and Narcissi is unquestioned and these flowers now form a leading feature in almost every Spring garden. Every Gardener should realize the enormous amount of intense pleasure that can so easily be obtained from the cultivation of a batch of Daffodils or Narcissi.

Indication and origin of the name Daffodil and Narcissus. The use of the terms Narcissus and Daffodils is being confused a great many times. There is a tendency to apply 'Daffodil' to varieties of which the trumpet or cup is as large or larger than the perianth, while the name Narcissus indicates varieties having small cups. The term Narcissus however, is correct for all different types of Daffodils and Narcissis. The name Daffodil is from an interesting origin. In the fifteenth century, the words affadile and affodylle applied for asphodel, a Narcissus with a large cup. In 1538 Turner writes about affadyll and daffadilly. Ten years later he says in his "Names of Herbes" that an English whyte affodil is a Duche Daffodil. He uses the forms affodil and daffodil in 1551. The name Daffodil was then used by Gerarde, when he used this term in his Herbal.

Other forms of Daffodil have been: aphrodillus, affodillus, daffodilly, daffadyl, affodyll, daffodyll,

pseudo-narcissus and bastarde-narcissus.

The origin of the term Narcissus has not been connected with so much variance. It is accepted that the name has been deduced from the Greek verb Narkaoo (Lat. obtorpesco), which means to narcotize, as the flower was considered to do so. There is also a Greek mythe that accounts for the name, in which Narkissos is the chief character.

Naturalizing Daffodils and Narcissi in Grass etc. All Daffodils and Narcissi are suitable for naturalizing but in very heavy soils, preference should be given to stronger growing sorts e.i. Trumpet varieties and many Large Cupped sorts. They are all admirably adaptable for grassy slopes and banks, where they should be freely planted. A splendid effect is obtained when Trumpet and other varieties are grouped separately, scattered on the ground and planted where they fall.

Soil and its Treatment. Daffodils and Narcissi will thrive in any well cultivated and drained garden soil. In preparing the ground for planting, dig deeply and if well rotted stable or cow manure is available this may advantageously be dug in 18 to 20 inches deep so as not to come into immediate contact with the bulbs. Never use fresh manure of any kind at planting time. On poor and dry sandy soils we recommend a dressing of sulphate of potash at a rate of about 1 oz. per square yard to be sprinkled over the surface of the ground after planting.

Growing Daffodils in the greenhouse or indoors. All types of Daffodils and Narcissi are suitable for this purpose. Pot up the bulbs on arrival and if ordinary pots are used take a good loamy soil, adding sufficient sand and peat to keep the mixture open. A light dusting of bone meal is also useful. Pot firmly in well crocked pots. For bowls without drainage holes use a good fibre. Plunge the pots and/or bowls in the coolest place of your garden and in the absence of garden space the pots may be placed in a cool cellar (35–40° F.) where watering from time to time is necessary. When the shoots are about 4 inches long and the flower buds well out of the neck of the bulbs, the pots may be removed into a warm room. Heat should be gradually increased from 50° to max. 60° F.

It is advisable to remove the foliage of the sideshoots, if these do not show a flower bud. Just before the buds are open water lightly, when they are in bloom less water should be applied.

Revision of the Classification of Daffodils. In this catalogue we have adopted the revised system for the new R.H.S. classification of Daffodils and Narcissi formally approved by the General Bulb Growers Society of Haarlem (Holland) and the Daffodil Societies of America, Canada, Australia, Tasmania and New Zealand.

The principal changes on comparing the old system with the new one are as follows:

The former Leedsii, Incomparabilis and Barrii Divisions are transferred into two Divisions: viz. Division II Large-Cupped Narcissi with its sub-divisions a, b, c, d and Division III Small-Cupped Narcissi with its sub-divisions a, b, c and d.

The whole Genus is now classified in eleven Divisions as follows:

Ia. Yellow Trumpets – Ib. Bicolor Trumpets – Ic. White Trumpets – IIa. Large-Cupped, yellow perianth, coloured cup or corona – IIb. Large-Cupped, white perianth, coloured cup or corona – IIc. Large-Cupped, white perianth, white cup or corona – IId. Large-Cupped, not falling in a, b, or c. – IIIa. Small-Cupped, yellow perianth, coloured cup or corona – IIIb. Small-Cupped, white perianth, coloured cup or corona – IIIc. Small-Cupped, white perianth, white cup or corona – IIId. Small-Cupped, not falling in a, b, or c – IV. Double varieties – V. Triandrus Narcissi – VI. Cyclamineus Narcissi – VII. Jonquilla Narcissi – VIII. Tazetta Hybrids (Poetaz etc.) – IX. Poeticus Narcissi – X. Species and Wild forms and Hybrids – XI. Miscellaneous Narcissi not falling into any of the foregoing Divisions.

New and Choice Daffodils

We offer the following list of very choice Daffodils and Narcissi, which should be of special interest to the Connoisseurs. The Bulbs offered are top sized and orders for these particular varieties should reach us as early as possible, not later than the 15th of September, after which date we replant our stock. The earlier the Bulbs are planted the better the results. The Standard varieties of Daffodils and Narcissi enlisted further in the catalogue can, of course, be ordered all through the season.

- Adamant (Large-Cupped 2a), F.C.C., R.H.S. 1954, deep saffron-yellow smooth perianth of perfect form with a rich medium-sized orange crown frilled at margin, a flower of wonderful quality and substance, well poised on a strong stem.

Crescendo (Large-Cupped 2a), A.M., R.H.S., a striking flower of the highest quality with beautifully smooth clear yellow rounded perianth of good substance, straight, deep yellow crown, very broadly margined orange-scarlet. A very lasting flower either on the plant or when cut, good for pots.

35 cts. each; \$ 3.50 per doz.

Crocus (Large-Cupped 2a), F.C.C., R.H.S., A.M. Birmingham, a very striking flower which might almost be classed as a trumpet, broad perianth and well flanged trumpet of great substance and of most intense golden-yellow throughout.

30 cts. each; \$ 3.00 per doz.

Cromarty (Yellow Trumpet 1a), A.M., R.H.S., this trumpet of faultless form and beautiful quality has broad smooth flat perianth standing at right angles to the neatly flanged and serrated trumpet, ideal garden plant of great lasting power, moreover a perfect Exhibition flower of faultless form, finish and colour.

50 cts. each; \$ 5.00 per doz.

Cushendall (Small-Cupped 3c), A.M., R.H.S., in our opinion the best green-eyed flower under cultivation; it is of faultless

form, quality and splendid substance, broad smooth circular overlapping perianth of purest sparkling Poeticus-white, very shallow saucer crown edged with a delicate cream-coloured frill, the whole centre is of a lovely moss-green, very late. \$ 1.00 each

Daytona (Small-Cupped 3b), a well-formed fine flower with broad, flat overlapping pure white perianth and an almost flat solid brick-red crown with a well-crinkled edge. 25 cts. each; \$ 2.50 per doz.

Dominator (Yellow Trumpet 1a), A.M., Haarlem 1948, a real giant among the trumpets and a wonderful Daffodil in size and substance, balance and proportion, having broad thick overlapping perianth of deep golden yellow with large serrated golden yellow trumpet, a magnificent flower for the garden and exhibition. \$ 1.75 each

Double Event (Double 4), A.M., R.H.S. 1952, a very round flower, the larger segments are pure white and interspersed among them in the centre are small segments of soft lemon yellow. A very distinct novelty; fine robust plant with strong tall stems. \$ 10.00 each

Duke of Windsor (Large-Cupped 2b), F.C.C., Haarlem, one of the choicest John Evelyn seedlings, thick pure white overlapping segments with a broad flat expanding cup of lovely apricot-orange, beautifully ruffled, becoming a lovely pale yellow as the flower ages, a charming garden plant (see illustration page 50).

50 cts. each; \$ 5.00 per doz.

Dunlewey (Large-Cupped 2c), A.M., R.H.S., a fine large flower of perfect form and quality, broad smooth pure white perianth with large creamy cup, rather short in stem but its amazing freedom to bloom makes it a splendid garden plant.

35 cts. each; \$ 3.50 per doz.

Dutch Master (Yellow Trumpet 1a), A.M. Haarlem 1948, a rich golden-yellow trumpet of a remarkable refined form, broad overlapping perianth with a deeply serrated large trumpet, a vigorous grower, excellent forcer and fine Show-flower.

75 cts. each; \$ 7.50 per doz.

Broughshane

- Falaise (Double 4), a unique double, raised from Mary Copeland; the pollen parent must have been a Poeticus as the petals are of the purest white and the flower has the true Poeticus-scent. The centre is bright orange-red which makes a striking contrast against the rather long pure white inner petals. A lightly built flower well poised on a tall wiry stem, late.

 85 cts. each; \$ 8.50 per doz.
- Fermoy (Large-Cupped 2b), F.C.C., Haarlem 1951, a magnificent flower of great size and fine quality with very large pure white perianth and well proportioned beautifully frilled bowl-shaped crown, bright orange-red at the mouth shading to gold in the base, very vigorous plant. Golden Harvest

Division I - Trumpet Narcissi

Distinguishing characters: One flower to a stem; Trumpet or Corona as long as, or longer than the Perianth segments

DIVISION IA - YELLOW TRUMPETS

Yellow and sulphur-coloured Trumpet Narcissi

Aerolite (19), a very fine bold flower of good poise and carriage, perianth deep primrose with a slightly deeper yellow trumpet, extremely long lasting and a fine garden flower or for cutting.

\$ 2.05 per doz.; **\$ 14.00** per 100

Burgemeester Gouverneur (22), F.C.C. Haarlem, a very large and beautiful flower, colour self-yellow throughout, perianth flat and broadly overlapping, while the large smooth trumpet is slightly rolled back at rim, a noble Daffodil which we can especially recommend.

\$ 2.65 per doz.; **\$ 18.00** per 100

Emperor (20), deep golden yellow trumpet with broad primrose perianth and robust growth, should be planted in generous quantities in beds and borders and naturalizing in grass, etc.

\$ 2.05 per doz.; \$ 14.00 per 100

Flower Carpet (20), this new introduction may be described as an improved King Alfred but gives more flowers per bulb, it produces a perfectly formed golden yellow flower of great substance.

\$ 2.20 per doz.; **\$ 15.00** per 100

Garron (24), A.M., Wisley Trials and Haarlem, a magnificent refined flower of unusual quality and size, has a great long pointed and slightly waved perianth of smoothest velvety texture and thick substance, trumpet nicely serrated of beautiful deep clear primrose or soft full self lemon, enormously vigorous and grand garden plant (see illustration opposite page 41). **45 cts.** each; \$ **4.50** per doz.

Godolphin (16), A.M., R.H.S. and Haarlem, truly a very noble golden yellow flower of fine form and great size, vigorous grower of tall habit and early flowering. Also fine for exhibition.

\$ 2.20 per doz.; **\$ 15.00** per 100

- Golden Harvest (22), E.F.A. Haarlem, this brilliant Daffodil of uniform rich golden yellow with heavily serrated trumpet and lovely form, has now become one of the most popular varieties in cultivation, admired for its strong texture and its wealth of flowers either forced in pots or planted in the garden, enormous flowers and one of the first to bloom (see illustration page 45).

 \$ 2.65 per doz.; \$ 18.00 per 100
- J. S. Bach (22), a very close competitor if not an equal to 'Flower Carpet', a newer introduction of which the Dutch Growers have great expectations for commercial purposes. The colour is uniform primrose-yellow strong grower of very free-flowering habit, good forcer and fine garden variety.

 \$ 2.20 per doz.; \$ 15.00 per 100
- King Alfred (24), this remarkably beautiful variety is destined to remain at the head of its class for some time to come yet; its rich colour of uniform deep golden yellow is outstanding; the large gigantic trumpet is elegantly frilled at mouth and has a broad massive perianth, is of refined finish and of great substance, hence its lasting qualities both outdoors or when cut. One of the earliest to bloom, it is easily forced very dependable. \$ 1.90 per doz.; \$ 13.00 per 100
- Lord Wellington (18), noted for its huge dimensions, refined beauty and enormous deep yellow trumpet slightly frilled at margin, an early forcer and unsurpassable as an Exhibition flower.

 \$ 2.65 per doz.; \$ 18.00 per 100
- Magnificence (20), F.C.C., R.H.S., the first yellow trumpet out, a very large deep golden yellow flower, gracefully waved perianth with deeply serrated trumpet, opens much before the well-known Golden Spur, which variety we have now superseded. 'Magnificence' produces a wealth of blossom and is very desirable for the garden as well as for forcing. \$ 2.65 per doz.; \$ 18.00 per 100
- Rembrandt (19), a very early large golden-yellow trumpet of lovely carriage, petals are flat, broad and somewhat pointed and has a huge expanded trumpet which is nicely flanged at mouth, a vigorous grower, excellent for pots and a showy decorative garden variety. \$ 2.20 per doz.; \$ 15.00 per 100
- Sole Mio (22), rich golden yellow Daffodil of noble form, stature and quality, rather pointed perianth segments large expanded trumpet which is nicely flanged and serrated at mouth. A lovely garden plant lasting a long time in good condition. \$ 2.65 per doz.; \$ 18.00 per 100
- UNSURPASSABLE (23), F.C.C. Haarlem, one of the most impressive and largest yellow trumpet Daffodils in cultivation, producing colossal flowers of deepest golden yellow throughout and noble proportion, a fine Show-flower, good forcer and a magnificent variety for the garden (see illustration opposite page 41). \$ 2.55 per doz.; \$ 17.50 per 100

\$ 2.20 per doz.; \$ 15.00 per 100

Topaz (16), a beautiful new introduction of free flowering habit, can best be described as a giant white

Jonquilla with large primrose-yellow cup, the fragrant flowers are held on tall stems, a valuable addition to this section and an ideal garden-variety.

\$ 1.30 per doz.; \$ 12.00 per 100

Trevithian (13), F.C.C., Wisley Trials, a very beautiful variety having 2 or 3 flowers of uniform shade of pale lemon-yellow on a stem, with broad overlapping smooth perianth and medium sized shallow crown. A strong grower, recommended for gentle forcing in bowls. \$ 1.80 per doz.; \$ 12.00 per 100

Division VIII Tazetta Narcissi

(Comprising the former Poetaz Narcissi Bunch-flowered Group)

Distinguishing characters: Characteristics of any of the Narcissus Tazetta group clearly evident.

A beautiful race of Narcissi, tall vigorous growers, the individual flowers which are produced in a bunch resemble those of a Poeticus and are delightfully perfumed. They were raised by crossing Poeticus Ornatus and Narcissi Polyanthus, the former being the seed parent. Perfectly hardy and may be left undisturbed in the garden for years. We can also strongly recommend them for gentle forcing.

Admiration (19), a beautiful showy variety with 4 to 6 flowers on a stem, perianth pale yellow, cup orange heavily margined scarlet, profuse bloomer, ideal for forcing and a grand bedding variety.

\$ 2.05 per doz.; \$ 14.00 per 100

Cheerfulness (Double) (19), a double form of Elvira, creamy-white perianth with a full double centre of pale yellow and of extreme sweetness, very distinct and decorative, strong grower. Officially classified under Division IV. \$ 1.40 per doz.; \$ 9.50 per 100

Cragford (14), A.M., Haarlem and R.H.S., a recent introduction of great beauty and value on account of its extreme earliness and its easy response to forcing, strong pure white perianth of excellent form with a brilliant scarlet cup, can successfully be grown in pebbles in water like Paperwhite Narcissus to bloom just after Christmas. Its perfume is delicious. \$ 2.05 per doz.; \$ 14.00 per 100

Fairness (Double) (19), a splendid double form of Tazetta N. Admiration, several double flowers on a stem, pale yellow interspersed orange and scarlet, very decorative, good grower (officially classified under Division IV). \$ 2.05 per doz.; \$ 14.00 per 100

Geranium (16), a Poetaz-Hybrid of great beauty, bearing on strong stems heads of 4 to 6 flowers with broad pure white petals of solid substance and a bright orange-scarlet cup, a very effective late flowering variety much recommended for the border, sturdy grower fine for pots and for forcing from the middle of February (see illustration).

\$ 1.45 per doz.; \$ 9.75 per 100

Laurens Koster (22), bearing on tall graceful stems heads of 5 to 6 large flowers with solid rounded

perianth and pale yellow cup, good grower and one of the best for forcing.

\$ 1.40 per doz.; \$ 9.50 per 100

L'Innocence (15), pure white perianth with a deep yellow eye, having 4 to 6 flowers on each stem, blooms freely and may be grown in water and pebbles, very dependable. \$ 1.80 per doz.; \$ 12.00 per 100

Martha Washington (20), A.M., Haarlem, an outstanding and beautiful variety with substantial flowers as large as a 'Barrii', broad snow-white overlapping perianth with a well proportioned cup, having two, three flowers on a stem, vigorous grower.

\$ 2.20 per doz.; \$ 15.00 per 100

Primrose Beauty (19), remarkable fine primrose coloured sport from the well-known Cheerfulness with all its pleasing characteristics, a most lovely flower of delicate colour, extremely useful for decorative purposes and also a vigorous garden plant. \$ 1.80 per doz.; \$ 12.00 per 100

Scarlet Gem (15), A.M., Wisley, in our opinion this is one of the best bunch-flowered Narcissi yet raised, it is a very showy free flowering variety with primrose-yellow perianth and brilliant orange-scarlet cup. \$ 1.55 per doz.; \$ 10.50 per 100

St. Agnes (16), A.M., R.H.S. and Haarlem, this lovely variety deserves wide popularity to do justice to its beauty and attractiveness, a very beautiful Poetaz, large pure white perianth and expanded eye of brilliant deep solid red, several large flowers to a stem, a splendid garden flower.

Hyacinths

The best hand-picked quality, choice bulbs selected from healthy stocks, adapted for Bowls, Pots, Glasses and for Exhibition. We include only valuable varieties in our Collections.

CULTURE IN POTS

Hyacinths should be potted early in September for Christmas flowering and every fortnight thereafter for succession. Plunge pots in the coolest place of the garden, or place in a dark, cool cellar.

After three or four months, remove to the forcing house as required, but care should always be taken that the bulbs are well rooted and the buds well out of the neck of the bulbs before beginning to force, as successful cultivation depends almost completely on these points. To keep the foliage dwarf and to assist the perfect colouring of the flowers, they should have occasionally a supply of liquid manure during the growing period. Always use clean old pots.

HYACINTHS ON GLASSES

This old fashioned way is in favour again now that the proper glasses are on the market.

Fill the glass with water (rainwater preferred) so as almost to touch the base of the bulbs, a few pieces of charcoal should be put in the glass, as this keeps the water pure. The next procedure is the simple one of placing the glasses in any dark cool room, cellar or cupboard until the sprouts are about 3 inches high, then they may be brought gradually to the full light. Although this system of culture is very simple, it is of the first importance that suitable bulbs should be obtained.

OUTDOOR CULTURE

For successful cultivation in the open air, Hyacinths may be planted any time from September to December. September and October being the best months; they like a light rich soil, the ground should be sufficiently drained to prevent it becoming too retentive of moisture; plant the bulbs at equal distances apart in circles or straight lines and about 5 inches deep. Never plant the bulbs when the ground is wet. They require a little covering of straw or a thin layer of leaves during the winter to protect them from frost.

Hyacinths for Bowls or Bedding

These are specially selected, second size bulbs, hand-picked and perfectly healthy, which we can recommend with every confidence for forcing purposes.

If bulbs are forced in quantities in boxes or large pots, they may be transferred into Bowls, Jardinets etc. when coming into bloom; this may be done without the least check or injury to the blooms.

COLLECTIONS FOR BOWLS OR BEDDING

These collections are perfectly blended varieties of the finest Hyacinths containing an exciting range of beautiful colours with outstanding qualities of sturdiness and dependability.

Royal Dutch Amaryllis

(Hippeastrum)

Through generations of skilful plant breeding a few Dutch growers have produced hybrid Amaryllis of magnificent proportion and breathtaking beauty in a good range of clear colours. Each colour grown from one exhibition type bulb by means of vegetative scale production method, which assured that every bulb in a given colour blooms exactly like another bulb of the same colour.

We offer a fine collection of named varieties, which are all tested in the Valleevue Test Garden of Cleveland (U.S.A.) 1950 and 1951.

Large Dutch Crocus

When planted two or three inches apart in squares, the many flowers each bulb produces will thickly cover the whole plot, planted in lawns and grass they are extremely effective. They are also very fine for forcing but should be forced slowly in an airy situation. Crocuses should not be planted too deeply and can be left undisturbed for years.

COLLECTIONS OF CROCUS

Something very attractive to have in bloom in pots during winter is a collection of our choice large flowered Crocus. Plant thickly in pots immediately on receipt and plunge the pots in peat fibre or ashes. Crocuses cannot stand artificial heat and should be grown as cool as possible and given water freely when removed from the plunging bed. If the temperature is too high they will go blind. These collections can, of course, also be used for more liberal plantings in the garden.

Winter-Flowering Crocus Species

There are no bulbs that give more pleasure in the garden as these Crocus-species and a rockery may be made more attractive, not only because of the greater variety, but also by reason of the succession of flowers produced by the various species. We strongly recommend them for a trial, if you are not already acquainted with them. They should be much more extensively cultivated on account of their unsurpassed decorative beauty. Plant 3 to 4 inches deep.

Hardy Cyclamen

The hardy species of Cyclamen are very interesting and pretty bulbous plants that will grow freely in short grass beneath trees, on half-shaded rock-work and as clumps in flower borders of a dry description. They prefer well-drained sites and thrive so much better if a little lime rubble is well incorporated with the staple soil. They are of dwarf habit, have lovely foliage and produce a charming effect.

Autumn-flowering; Orders should reach us before 15th August

For many garden-amateurs the range of varieties offered in this list may be somewhat overwhelming, so if you are not familiar with them, please order our collections, which are made up very carefully as we want them to give complete satisfaction and therefore only include varieties of proven merit, the same time giving a wide range of colours.

Irises (Bulbous Rooted)

It would be difficult to name any other hardy bulbs that repay the trouble of cultivation better than the Iris. Their blossoms compete in richness and variety of colours with the choicest and most beautiful Orchids. They are most easy to cultivate and succeed splendidly in almost any soil. As cut-flowers they are particularly useful as the blooms last well if cut as the buds are opening.

Ornithogalum umbellatum

Double Peonies

HOLLAND GROWN STURDY YOUNG ROOTS WITH 3 TO 5 EYES

Ready for shipment in September

Culture: Peonies should be set so that the buds are definitely not below two or three inches under surface of soil. New plants should never be set in ground from which established Peony clumps have been recently removed. The Peony likes rich ground, but the roots must not be placed in contact with manure. Some protection from sunlight helps the flowers to retain the full delicacy of their colouring, which fades out in full sunlight. On the other hand, the Peony detests having its ground invaded by tree roots.

The number following each name is the percentage rating given by the American Peony Society.

Giant Ranunculus

Ranunculus Grandiflora Choice Mixed Colours. You cannot really appreciate the bold and brilliant beauty of this new strain of Peony-Flowered Ranunculus until you have planted some patches in your garden to see the wonderful colours of this long stemmed and very free-flowering new race. It nearly contains all colours of the rainbow. They require a sunny, well drained position in the garden and they can be planted from December until April. Plant 2 inches deep, giving protection in the winter.

65 cts. per doz.; \$ 4.50 per 100

Richardia (Calla)

aethiopica, the well-known white Arum Lily, easy house plant to grow. Plant one in a pot in late fall with top of tuber barely covered with rich soil, plenty of water should be given during growing period.

40 cts. each; \$ 1.00 per 3, extra large tubers

Elliottiana, the golden Arum Lily is offered in our Spring catalogue.

Scilla (Squill)

(Early flowering)

A very charming plant for early Spring flowering, either planted in masses or for edging. They are of dwarf and compact habit, excellent for bedding in pots, bowls, etc. and form a pleasing effect among indoor plants. Recommended for planting in generous quantities.

bifolia, dwarf deep blue flowers which bloom with the Winter Aconite in February, excellent for masses and edgings in borders and in the rock-garden.

40 cts. per doz.; \$ 2.50 per 100

95 cts. per doz.; \$ 6.50 per 100

Tubergeniana, soft blue on a silvery white ground, a very outstanding and early flowering novelty, a beauty for the rockery and very successful for pot-culture. Small clumps and tiny patches of this variety are much admired for their brightness of colour, when there is hardly anything else in flower in the garden.

\$ 2.00 per doz.; \$ 14.00 per 100

Scilla Campanulata

(May-flowering)

Very beautiful and popular Spring-flowers, blooming in May, commonly called Wood Hyacinths. They are quite hardy and very fine for naturalizing in woods, wild gardens, shrubberies, borders, etc., where they should be planted freely. They will thrive in such shady places where other plants will die. They are also suitable for gentle forcing. Plant 4 to 5 inches deep.

Campanulata Blue Queen, producing erect spikes of a charming porcelain-blue shade, vigorous grower and very free flowering, recommended.

60 cts. per doz.; \$ **4.00** per 100

Campanulata Excelsior, bearing extra large bold spikes of a bright blue colour with unusual large bells, very strong and sturdy habit.

White Triumphator, a very robust variety of recent introduction producing very large pure white flowers, extra good.

60 cts. per doz.; \$ 4.00 per 100

Sparaxis

Lovely bulbous plants of the same habit as Ixias. The flowers are even larger in size and produce a combination of colours rarely seen in any other race of bulbs or plants. They deserve to be cultivated more extensively. Very useful for pots, rock- and alpine garden etc.

Beautiful Mixture of many Sparaxis varieties, also including Fire King.

50 cts. per doz.; \$ 3.50 per 100

Fire King (8), flaming red with conspicuous yellow pencilling and black at base, one of the choicest varieties, extremely lovely in the rock-garden (see illustration opposite page 77).

60 cts. per doz.; \$ 4.00 per 100

Single Snowdrops

Snowdrops

(Galanthus)

There is nothing more pleasing in the garden than a large batch of the snowy graceful blossoms of the Snowdrops at the end of January. Permanent plantings of Snowdrops should be done in partly shady situations.

Double Snowdrops (Galanthus nivalis flore pleno), the well-known Double Snowdrop, having large globular blooms of peerless white with a touch of green inside, gracefully carried on their slender stems and most satisfactory for naturalization and mass planting.

85 cts. per doz.; \$ 6.00 per 100

Single Snowdrops (Galanthus nivalis), the lovely common Single Snowdrop of which folks say: 'Fair Maids of February are back again', the favourite flower in the earliest part of the year; very attractive when grown in grass or woodlands and neglected shady places, where they are happy and never sorry (see illustration).

60 cts. per doz.; \$ 4.00 per 100; \$ 38.00 per 1000

nivalis viridi-apice, flowers are white tipped green on outer petals, very beautiful and curious, limited stock. \$ 1.40 per doz.; \$ 9.75 per 100

Elwesii, very large flowering species, with immense snowy-white globular flowers, very early. Asiatic form.

75 cts. per doz.; \$ 5.00 per 100

Sternbergia

(Autumn-flowering)

Bulbs are not available after September 1st.

lutea, producing an abundance of rich golden yellow, Crocus-like flowers in autumn. It thrives well and happily in a well drained position with a southern aspect, where they may be left undisturbed for years. Plant bulbs 8 to 10 inches deep. In cold districts they should be protected against severe frost. They may also be grown in pots or bowls to flower a few weeks after planting.

\$ 1.30 per doz.; \$ 9.00 per 100

Tecophilea

(Chilian Blue Crocus)

cyanocrocus, a rare but glorious deep gentian-blue species, with conspicuous small white centre, narrow bright green glossy leaves, two inches in length and from them upon three inch stems flowers which have a resemblance to a crocus, but the brilliancy of the colour is of beautiful intensity. It is completely hardy, but is so rare that it is probably best grown in the safety and shelter of a pan in the Alpine house.

\$ 4.00 each

Tritonia

Pretty little hardy Cape bulbs, requiring the same culture as Ixias. If grown in a cold frame or cool greenhouse, they are seen at their best.

crocata Orange Delight, a very pleasing shade of orange. 75 cts. per doz.; \$ 5.00 per 100 hyalina, exquisite kind not unlike crocata, but with uniform soft salmon-pink flowers and beautifully transparant base, a lovely dainty cutflower, lasting long in good condition.

\$ 1.40 per doz.; \$ 9.75 per 100

Veltheimia

Veltheimia Capensis, a most attractive bulbous-plant from Africa, easy to grow indoors and much admired for its graceful shiny green leaves and strong spike with close round compact head of greenish-pink flowers. One bulb in a pot gives an ideal plant of very lasting qualities. Planting time October-November to flower in January.
